

**NEW FOR 2018**

# CROSSFIRE

RED DOT SCOPES

## GREAT PERFORMANCE IN A VALUE PRICED RED DOT

**FOR IMMEDIATE RELEASE: January 9, 2018**

**Guelph, ON** – For close-in work and general shooting it's tough to beat a quality red dot sight. The new super-light, ultracompact, durable, fast-on-target **Crossfire Red Dot** delivers great performance for a budget price.

The **daylight-bright 2-MOA dot** acquires targets easily and promotes rapid engagement in close-quarters scenarios, yet is fine enough to precisely engage distance shots. **11 brightness intensity levels** let shooters cater the dot intensity to the situation at hand. The **skeletonized mount** offers two mounting-height options – lending functionality not only to AR-15s, but to shotguns and pistols as well.

**Fully multi-coated lenses** deliver a bright, crisp sight picture. Red dots offer unlimited eye-relief and parallax-free performance. The aircraft-grade aluminum body is rugged and lightweight. Turrets click in 1-MOA graduations and feature protective caps. The Crossfire is nitrogen purged for waterproof, fog-proof and shockproof performance. The unit runs on a common CR 2032 battery, included with purchase.

Like all Vortex optics, the new Crossfire Red Dot is protected with a lifetime, transferable, no-fault **VIP warranty**.

SKU	MSRP*	DOT SIZE	DOT COLOUR	WEIGHT	LENGTH	EYE RELIEF ADJUSTMENT	MAGNIFICATION
